INTRODUCTION

The objective of this project is to develop a general purpose e-commerce store where any kind of product can be bought from the comfort of home through the Internet.

An online store is a virtual store on the internet where customers can browse the catalog and select products of interest. The selected items may be collected in shopping cart. At checkout time, the items in the shopping cart will be presented as an order. At that time, more information will be needed to complete the transaction. Usually, the customer will be asked to fill or select a billing address, a shipping address, a shipping option. An e-mail notification is sent to the customer as soon as the order is placed.

PROJECT DESCRIPTION

GITHUB - https://github.com/programmer9044/xenonstack

For Login ID – manishg@gmail.com , Password – Maddy@123

- Any member can register and view available products.
- Only registered member can purchase the products.
- Contact Us page is available to contact Admin for queries.
- There are four roles available:

  - Visitor
  - User
  - Operator
  - Admin

  - Visitor can view, search available products.
  - User can view and purchase products,
  - Operator can excess and option and can view everything of admin panel.
    - ✓ Operator can add product, edit product, update and remove product.
